

Welcome to Meadowbrook Marsh!

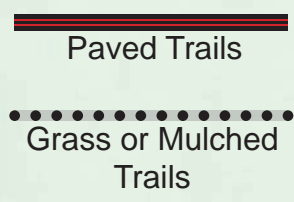

A public nature preserve owned and operated by
 The Danbury Township Board of Trustees
www.danburytownship.com

The 113 acres within Meadowbrook includes a category 3 wetland marsh, forest, meadow and grassland. The wetland located on the west side of the bridge will never experience development and is home to an amazing selection of waterfowl. You may view it from the dike but please be careful as you walk along heavily traveled Bayshore Road. On the east side of the bridge you will enjoy an observation deck, 2,800 feet of ADA accessible paved trails and another 3,000+ feet of mulched and grass trails. You will find that all trails intersect. Improvements to Meadowbrook are ongoing and will include future trails. We do not permit hunting, motorized vehicles or horses. Please keep dogs on a leash and collect their waste. Meadowbrook has a vast array of migratory birds and waterfowl, deer, muskrat and coyote along with dozens of other natural wonders and wildlife. Our bird species include songbirds, bald eagle, pheasant, egrets, great blue heron, green heron, screech owl, great horned owl, red tailed hawk, belted kingfisher and broad shouldered hawk. Enjoy your visit and please leave only your footsteps behind!

Opening Meadowbrook to the public was made possible by funding from Danbury Township and grants from the following entities:

- ODNR Coastal Management in conjunction with NOAA
- ODNR Land and Water Conservation
- ODNR Natureworks
- Ohio Public Works Clean Ohio
- Ottawa County Community Foundation
